

Movie Recommendation Application

WireFrame Documentation

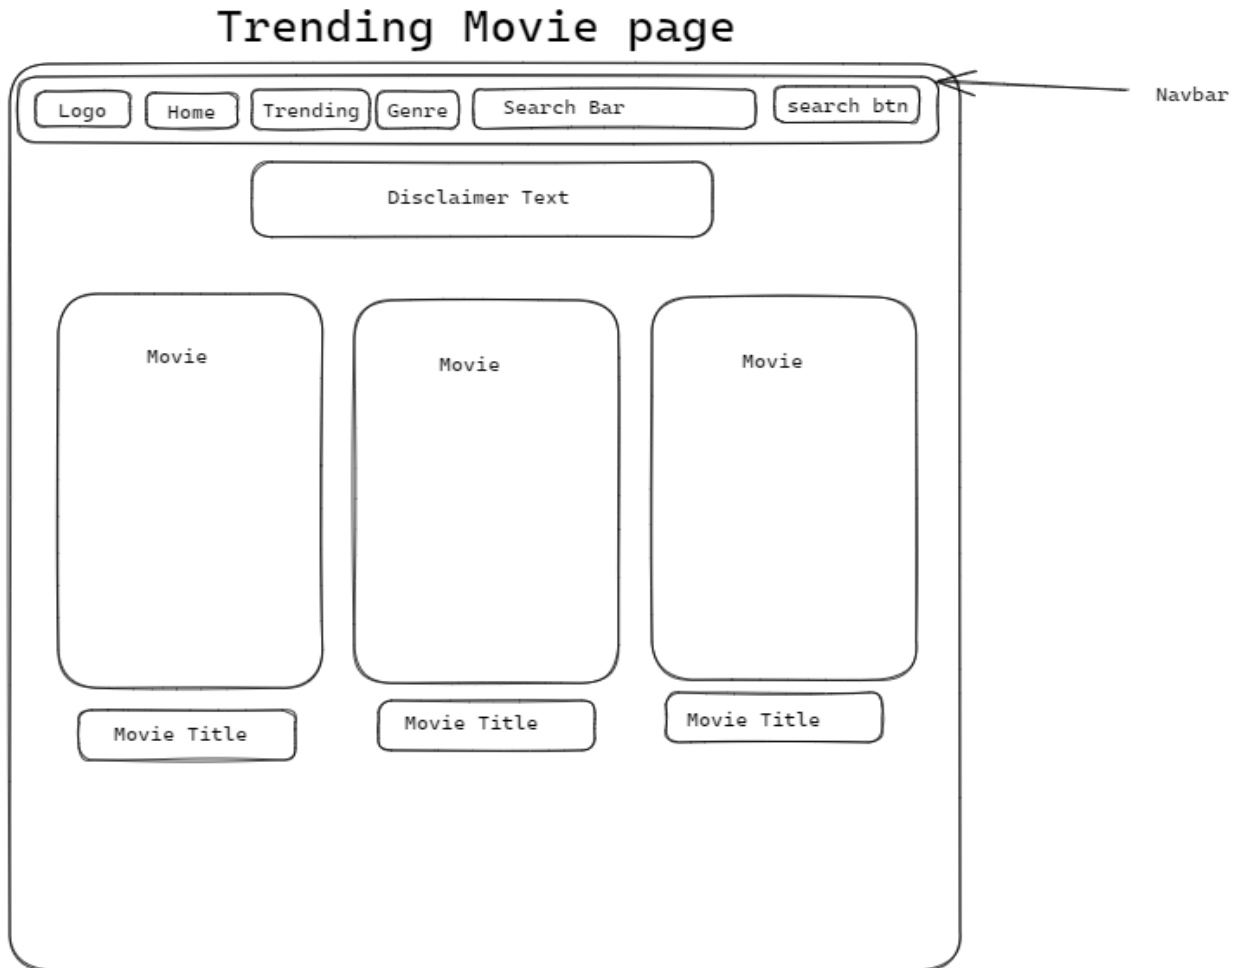

HomePage

1. First Homepage, when we open Homepage we get to see a Navbar, a text message, and movie cards.
 - 1.1 In Navbar we have the logo, a home button, a trending button to go to the trending section, a genre button to go to the genre selection screen a search bar to search for movies, and a search button to initiate the search.
 - 1.2 The Movie card consists of information related to movies and is clickable to get more details.

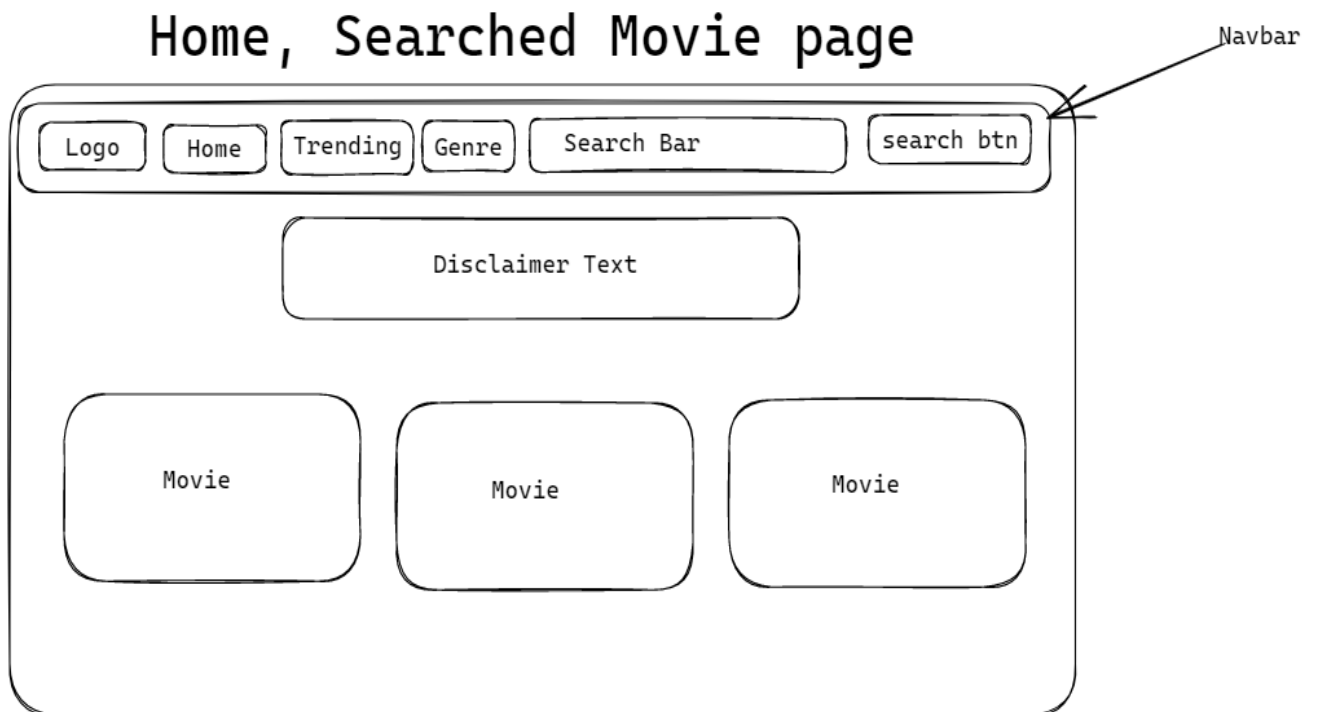

Trending Page

2. The trending section is similar to Homepage, with Movie Cards styled differently.

Searched Movies

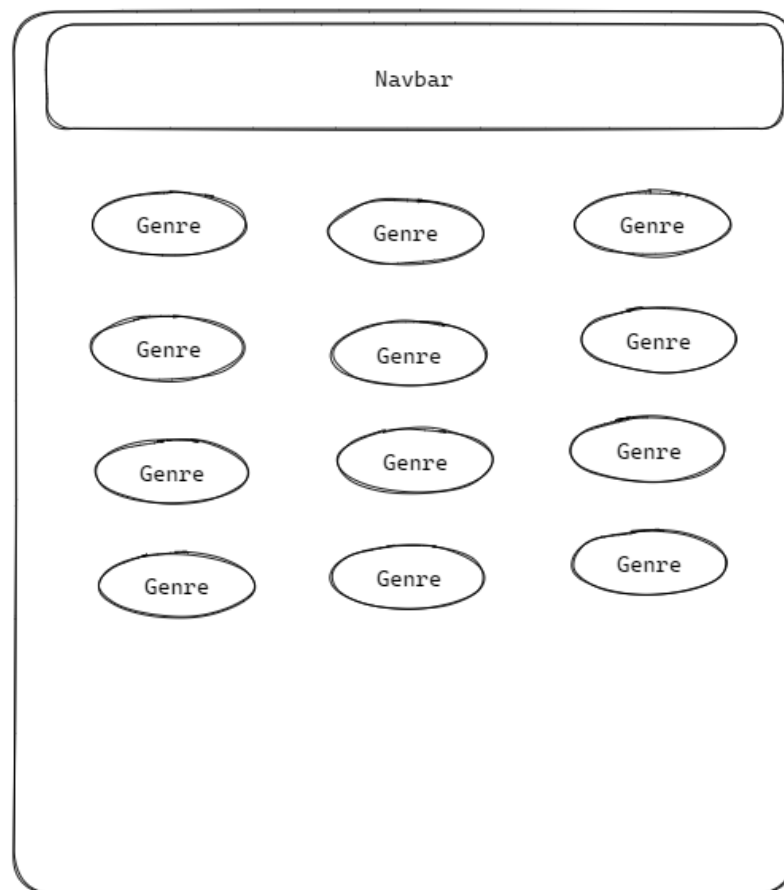

3. The Search Results are displayed on the Homepage with the same style as Homepage Movie Cards

Genre Page

4. Genre Page consists of the different genres present in the database, When we click on the genre page we are redirected to a general movie list page.

Genre Page

Movie Page

6. Movie Page consists of all the movie details such as title, release date, language, rating, votes, description, trailer link, movie poster, and backdrop image as the background
